

# greenID Admin Panel optional Two-Factor Authentication 2FA (TOTP)

---

Oct 2020

greenID admin panel is accessed via email address and password. Optionally we support login to greenID admin panel with two-factor authentication (2FA) in addition to email / password.

Our 2FA solution uses Time-based One-time Password (TOTP) algorithm.

This means that when admin users' login with their email and password, they will also be prompted to enter a one-time code using the Google Authenticator app.

Please contact your greenID Account manager for more details.
