## Enhanced business capability

Our best-in-class global datasets and technology engine enable our clients and partners' to significantly enhance the functionality and capability of their own product offerings.

## Global quality data

Our solution will parse, standardise, verify, cleanse and format address data for over 245 countries and territories, all via a single, easy-to-integrate global API. Loqate delivers enhanced value by securing and combining official postal authorities with unique geospatial reference datasets coupled with our superior parsing and matching engine.

## Trusted partner

We are a trusted partner to businesses across the globe, our expert team works with you to understand your requirements and tailors a solution fit to your specific use case.

## Every day our customers trust us to deliver a global, resilient and secure service

Loqate's Address Validation solution will parse, standardise, verify, cleanse and format address data for over 245 countries and territories, all via a single, easy to integrate global API.

### Global Knowledge Repository

The Global Knowledge Repository (GKR) is Loqate's proprietary master database which combines our Knowledge Base data and parsing rules with our location reference datasets for all countries and territories

### Transliteration

Loqate's solution transliterates words or letters from different global character sets into either native or Roman characters across 8 scripts including: Cyrillic, Hellenic, Hebrew, Kanji, Simplified Chinese, Arabic, Thai and Hangul.

### Deployment options

Our single and global API enables us to offer flexible deployment options – on premises, cloud or private cloud – to meet our partners and customers' specific implementation requirements.

### Verify millions of records per hour

Our cleansing engine is capable of processing millions of records per hour. You'll see a detailed indication of the validity of each address value included in the input address, reducing costly errors. This solution can validate both partial and full address inputs.

### Global Parsing Engine

Loqate's Global Parsing Engine consists of proprietary lexicon and context parsing rules created specifically for each country and territory around the world. The parsing engine standardises and cleanses addresses from unstructured and semi-structured data, automatically placing elements into the correct fields and eliminating erroneous non-address data.

Harmony RightAddress is now Loqate, a GBG solution.

Over 19,000 customers and partners trust Loqate, so you'll be in good company.
